

COMP4513 Node 2 Lab Instructions

The second node lab for the course is split across two labs. The first is lab14b, which covers MongoDB and access MongoDB in Node. The second lab is Lab 13b: Intermediate Node. While these step-by-step exercises (and the test-your-knowledges) aren't marked, I do think they will help you learn Node in a more hands-on manner.

What I will be marking is the Test Your Knowledge in Lab14b, page 21. You can find the files and the relevant instructions at:

<https://github.com/mru-comp4513-archive/comp4513-f2021-mongo>

<https://github.com/mru-comp4513-archive/comp4513-f2021-node2>

Do the mongo lab before the node2 lab. This is the first time these labs have been used in the classroom, so I would appreciate if you email me if you find any errors or have any recommendations for changes.
